PREFACE

The twenty-second annual volume of the Industrial Arts Index shows very little change in the list of magazines indexed. It is surprising that the mortalities and the impairment in quality are almost negligible in the list of periodicals chosen for indexing. The Bulletin of the International Management Institute was discontinued December, 1933. Refrigerating World has not published since February 1934. On the other hand many of the magazines have increased in size and improved in quality. The many new activities in connection with business recovery have presented unusual indexing problems. Indulgence of subscribers is asked if they fail to find this new information under the expected subject headings.

The titles listed monthly in "Recent Book Titles" number for the year 2229, and are included in this volume. These are in addition to the many United States government documents, state geological and engineering bulletins, university bulletins relating to business and technology and bibliographical bulletins from various sources.

The staff of the Index has not changed except for the loss of Leona Kohn, now Mrs. Charles Milton. To Mrs. Florence Phin should be given the credit for indexing the insurance and banking magazines.

M. E. P.
